

4+ Black Filter Eliminator - Super Concentrate

SUPER CONCENTRATE

By keeping your fuel system and engine in peak condition, Black Filter Eliminator reduces fuel consumption and repair bills.

When to use:

- Modern engines with high pressure fuel systems.
- Stubborn cases of filter contamination.
- You notice black sludge on your filters.
- You want to reduce DPF regeneration.
- You want a cetane & mileage boost.
- You are changing fuel filters too often.

What it does:

- Keeps asphaltene molecules in suspension.
- Boosts cetane number by as much as 6 points.
- Prevents blackening of fuel & fuel filters.
- Extends DPF & fuel filter life.
