

DOUBLE POLYMER PAINT SEALANT

Contains two crossed polymers providing long-lasting resistance and protection.

Contains cleaning agents which restore the paint's original shine.

Diminishes spiderweb scratches.

Contains carnauba wax.

Protects against UV rays.

Complete and requires no other product.

Silverwax Double Polymer Paint Sealant contains two cross-linked polymers for incredible resistance, strength and very long lasting protection. Cleaning agents restore paint's original shine and help fade angel hair caused by wear and tear. Its silicone formula makes water bead and protects against UV rays. Carnauba wax restores a brilliant sheen. Silverwax Double Polymer Paint Sealant comes complete and requires no additional product.
